

QWS3270 Secure v4.85 manual install instructions

Part I. Backup your customized user profile data for import to v4.85 later

1. Download the QWSBackup.zip file from this website.
2. Unzip the contents of the zip file to the local drive.
3. Right click on the QWSBackup.bat file and select "Run as administrator".

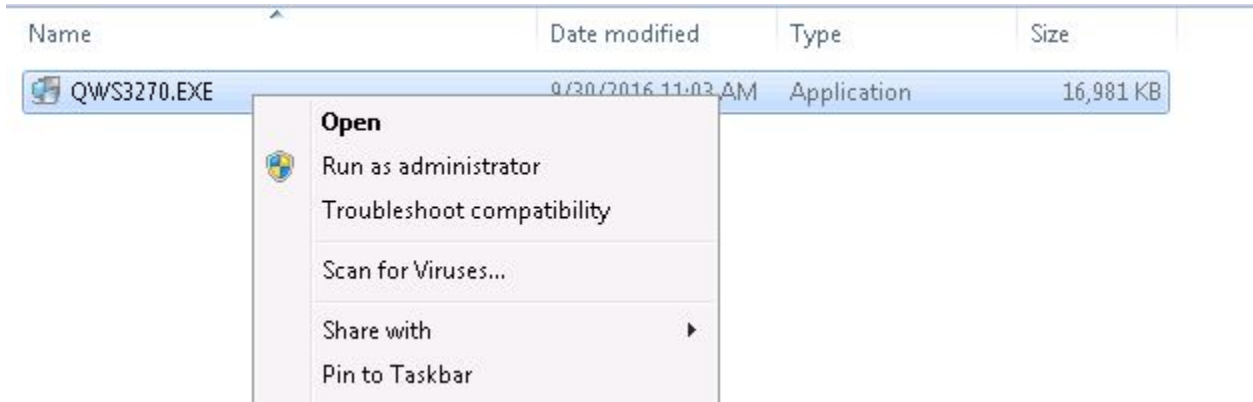

4. You should see a new folder created on the C: drive called "QWSBACKUP". This folder contains a backup of the QWS customizations contained in your current install. If this folder is not created, please DO NOT proceed to Part II and contact Krystina Casolino, k.casolino@columbia.edu, 212-853-0719, for assistance.

Part II. Install the QWS3270 Secure v4.85 software package

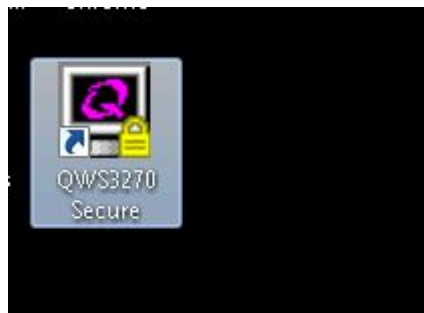

1. Download the install file (QWS3270.EXE) from this website to the local drive.
2. Right click on the .EXE file and select "Run as administrator".

3. Click OK to complete the install.

4. A shortcut for "QWS3270 Secure" will be created on the desktop.

5. The installation is complete.
